Topological Data Structures for Surfaces: An Introduction to Geographical Information Science

In Geography and GIS, surfaces can be analysed and visualised through various data structures, and topological data structures describe surfaces in the form of a relationship between certain surface-specific features. Drawn from many disciplines with a strong applied aspect, this is a research-led, interdisciplinary approach to the creation, analysis and visualisation of surfaces, focussing on topological data structures.

Topological Data Structures for Surfaces: an introduction for Geographical Information Science describes the concepts and applications of these data structures. The book focuses on how these data structures can be used to analyse and visualise surface datasets from a range of disciplines such as human geography, computer graphics, metrology, and physical geography. Divided into two Parts, Part I defines the topological surface data structures and explains the various automated methods used for their generation. Part II demonstrates a number of applications of surface networks in diverse fields, ranging from sub-atomic particle collision visualisation to the study of population density patterns. To ensure that the material is accessible, each Part is prefaced by an overview of the techniques and application.

- Provides GI scientists and geographers with an accessible overview of current surface topology research.
- Algorithms are presented and explained with practical examples of their usage.
- Features an accompanying website developed by the Editor - <http://geog.le.ac.uk/sanjayrana/surface-networks/>

This book is invaluable for researchers and postgraduate students working in departments of GI Science, Geography and Computer Science. It also constitutes key reference material for Masters students working on surface analysis projects as part of a GI Science or Computer Science programme.

From reader reviews:

Christopher Hairston:

Typically the book Topological Data Structures for Surfaces: An Introduction to Geographical Information Science will bring someone to the new experience of reading the book. The author style to spell out the idea is very unique. Should you try to find new book to study, this book very suited to you. The book Topological Data Structures for Surfaces: An Introduction to Geographical Information Science is much recommended to you to see. You can also get the e-book from your official web site, so you can quickly to read the book.

Santa McNabb:

Do you have something that you enjoy such as book? The reserve lovers usually prefer to decide on book like comic, short story and the biggest an example may be novel. Now, why not seeking Topological Data Structures for Surfaces: An Introduction to Geographical Information Science that give your entertainment preference will be satisfied by means of reading this book. Reading routine all over the world can be said as the opportunity for people to know world better then how they react toward the world. It can't be stated constantly that reading routine only for the geeky man but for all of you who wants to be success person. So , for every you who want to start looking at as your good habit, you can pick Topological Data Structures for Surfaces: An Introduction to Geographical Information Science become your personal starter.

Catherine Stoltenberg:

In this period globalization it is important to someone to find information. The information will make professionals understand the condition of the world. The healthiness of the world makes the information much easier to share. You can find a lot of personal references to get information example: internet, newspapers, book, and soon. You can observe that now, a lot of publisher which print many kinds of book. The particular book that recommended to your account is Topological Data Structures for Surfaces: An Introduction to Geographical Information Science this guide consist a lot of the information on the condition of this world now. This specific book was represented how can the world has grown up. The vocabulary styles that writer use for explain it is easy to understand. The particular writer made some analysis when he makes this book. This is why this book appropriate all of you.

Charles Aranda:

You may get this Topological Data Structures for Surfaces: An Introduction to Geographical Information Science by go to the bookstore or Mall. Merely viewing or reviewing it could possibly to be your solve problem if you get difficulties to your knowledge. Kinds of this book are various. Not only by written or printed and also can you enjoy this book simply by e-book. In the modern era similar to now, you just looking because of your mobile phone and searching what their problem. Right now, choose your ways to get more information about your reserve. It is most important to arrange you to ultimately make your knowledge are still update. Let's try to choose correct ways for you.
