Over the past sixty years, within the analytic tradition of philosophy, there has been a significant revival of interest in the philosophy of religion. More recently, philosophers of religion have turned in a more self-consciously interdisciplinary direction, with special focus on topics that have traditionally been the provenance of systematic theologians in the Christian tradition. The present volumes *Oxford Readings in Philosophical Theology, volumes 1 and 2* aim to bring together some of the most important essays on six central topics in recent philosophical theology. Volume 1 collects essays on three distinctively Christian doctrines: trinity, incarnation, and atonement. Volume 2 focuses on three topics that arise in all of the major theistic religions: providence, resurrection, and scripture.
