A Defeasible Logic Programming-Based Framework to Support Argumentation in Semantic Web Applications (Springer Theses) Naeem Khalid Janjua

This book reports on the development and validation of a generic defeasible logic programming framework for carrying out argumentative reasoning in Semantic Web applications (GF@SWA). The proposed methodology is unique in providing a solution for representing incomplete and/or contradictory information coming from different sources, and reasoning with it. GF@SWA is able to represent this type of information, perform argumentation-driven hybrid reasoning to resolve conflicts, and generate graphical representations of the integrated information, thus assisting decision makers in decision making processes. GF@SWA represents the first argumentative reasoning engine for carrying out automated reasoning in the Semantic Web context and is expected to have a significant impact on future business applications. The book provides the readers with a detailed and clear exposition of different argumentation-based reasoning techniques, and of their importance and use in Semantic Web applications. It addresses both academics and professionals, and will be of primary interest to researchers, students and practitioners in the area of Web-based intelligent decision support systems and their application in various domains.

From reader reviews:

Jill White:

The book A Defeasible Logic Programming-Based Framework to Support Argumentation in Semantic Web Applications (Springer Theses) can give more knowledge and also the precise product information about everything you want. So why must we leave a good thing like a book A Defeasible Logic Programming-Based Framework to Support Argumentation in Semantic Web Applications (Springer Theses)? Several of you have a different opinion about e-book. But one aim which book can give many information for us. It is absolutely correct. Right now, try to closer along with your book. Knowledge or facts that you take for that, it is possible to give for each other; you may share all of these. Book A Defeasible Logic Programming-Based Framework to Support Argumentation in Semantic Web Applications (Springer Theses) has simple shape but you know: it has great and massive function for you. You can search the enormous world by start and read a publication. So it is very wonderful.

John Valdez:

Here thing why that A Defeasible Logic Programming-Based Framework to Support Argumentation in Semantic Web Applications (Springer Theses) are different and dependable to be yours. First of all reading a book is good but it really depends in the content of computer which is the content is as yummy as food or not. A Defeasible Logic Programming-Based Framework to Support Argumentation in Semantic Web Applications (Springer Theses) giving you information deeper including different ways, you can find any guide out there but there is no guide that similar with A Defeasible Logic Programming-Based Framework to Support Argumentation in Semantic Web Applications (Springer Theses). It gives you thrill looking at journey, its open up your eyes about the thing that happened in the world which is perhaps can be happened around you. It is possible to bring everywhere like in area, café, or even in your technique home by train. When you are having difficulties in bringing the published book maybe the form of A Defeasible Logic Programming-Based Framework to Support Argumentation in Semantic Web Applications (Springer Theses) in e-book can be your choice.

Clara Gay:

Many people spending their period by playing outside together with friends, fun activity using family or just watching TV 24 hours a day. You can have new activity to shell out your whole day by looking at a book. Ugh, you think reading a book will surely hard because you have to take the book everywhere? It all right you can have the e-book, taking everywhere you want in your Touch screen phone. Like A Defeasible Logic Programming-Based Framework to Support Argumentation in Semantic Web Applications (Springer Theses) which is getting the e-book version. So , try out this book? Let's notice.

Tim Andrus:

You may get this A Defeasible Logic Programming-Based Framework to Support Argumentation in

Semantic Web Applications (Springer Theses) by look at the bookstore or Mall. Just simply viewing or reviewing it may to be your solve challenge if you get difficulties on your knowledge. Kinds of this reserve are various. Not only by means of written or printed and also can you enjoy this book by means of e-book. In the modern era such as now, you just looking of your mobile phone and searching what their problem. Right now, choose your ways to get more information about your publication. It is most important to arrange yourself to make your knowledge are still change. Let's try to choose proper ways for you.
