Paul L. Younger

Mine Water Hydrogeology and Geochemistry (Special Publication) (No. 198) Paul L. Younger

This book is a collection of keynote reviews and detailed case-studies covering the principal areas of active research and state-of-the-art industrial practice in the field of mine water management. It addresses both issues of water quantity (such as the impact of longwall mining on the piezometry and hydraulic properties of overlying aquifers) and water quality (spanning an array of sites from deep coal mines to open-pit base metal mines), as well as a wealth of hybrid, integrated studies in which hydrogeological and geochemical aspects are considered (and managed) together. The papers presented in this book are intended for practising geologists and engineers involved in the management of active and abandoned mine sites all over the world. It is also of interest to academic geoscientists and students with interests in low-temperature aqueous geochemistry and the hydrogeology of complex, quasi-karstic groundwater flow systems.

Also available:

200 Years of British Hydrogeology (Geological Society Special Publication) - ISBN 1862391556

Energy, Waste and the Environment: A Geochemical Perspective (Geological Society Special Publication) - ISBN 186239167X

The Geological Society of London

Founded in 1807, the Geological Society of London is the oldest geological society in the world, and one of the largest publishers in the Earth sciences.

The Society publishes a wide range of high-quality peer-reviewed titles for academics and professionals working in the geosciences, and enjoys an enviable international reputation for the quality of its work.

The many areas in which we publish in include:

- Petroleum geology
- Tectonics, structural geology and geodynamics
- Stratigraphy, sedimentology and paleontology
- Volcanology, magmatic studies and geochemistry
- Remote sensing
- History of geology
- Regional geology guides

From reader reviews:

David Crockett:

Have you spare time for any day? What do you do when you have considerably more or little spare time? Yeah, you can choose the suitable activity to get spend your time. Any person spent their particular spare time to take a go walking, shopping, or went to the Mall. How about open or even read a book entitled Mine Water Hydrogeology and Geochemistry (Special Publication) (No. 198)? Maybe it is for being best activity for you. You realize beside you can spend your time with the favorite's book, you can cleverer than before. Do you agree with the opinion or you have different opinion?

Jacqueline Kang:

Do you one of people who can't read gratifying if the sentence chained in the straightway, hold on guys this specific aren't like that. This Mine Water Hydrogeology and Geochemistry (Special Publication) (No. 198) book is readable by simply you who hate those perfect word style. You will find the details here are arrange for enjoyable studying experience without leaving also decrease the knowledge that want to provide to you. The writer connected with Mine Water Hydrogeology and Geochemistry (Special Publication) (No. 198) content conveys objective easily to understand by most people. The printed and e-book are not different in the information but it just different by means of it. So , do you continue to thinking Mine Water Hydrogeology and Geochemistry (Special Publication) (No. 198) is not loveable to be your top list reading book?

Esther Watson:

Reading a guide can be one of a lot of task that everyone in the world likes. Do you like reading book thus. There are a lot of reasons why people enjoyed. First reading a guide will give you a lot of new data. When you read a book you will get new information because book is one of several ways to share the information or perhaps their idea. Second, studying a book will make an individual more imaginative. When you examining a book especially hype book the author will bring one to imagine the story how the people do it anything. Third, you are able to share your knowledge to other individuals. When you read this Mine Water Hydrogeology and Geochemistry (Special Publication) (No. 198), you are able to tells your family, friends as well as soon about yours guide. Your knowledge can inspire average, make them reading a book.

Jamie Norman:

Do you like reading a e-book? Confuse to looking for your selected book? Or your book has been rare? Why so many query for the book? But any kind of people feel that they enjoy for reading. Some people likes looking at, not only science book but novel and Mine Water Hydrogeology and Geochemistry (Special Publication) (No. 198) or perhaps others sources were given understanding for you. After you know how the fantastic a book, you feel need to read more and more. Science e-book was created for teacher or even students especially. Those ebooks are helping them to add their knowledge. In some other case, beside

science guide, any other book likes Mine Water Hydrogeology and Geochemistry (Special Publication) (No. 198) to make your spare time far more colorful. Many types of book like here.
