Red Spike #1 (of 5) Jeff Cahn

'ADRENALINE'

It's been over 70 years since the world first began its research into creating a Super Soldier. In 2011, the United States successfully created not one, but two. The latest in US Black Ops, Project Red Spike discovered that through the manipulation and regulation of the adrenal glands the super soldier was one step closer. The first (surviving) successes of the program, two close friends Matt Cutler and Greg Dane, have been proven on the field to be everything that was wanting in the program. But what happens when an adrenaline regulator malfunctions? What happens should one man refuse to follow orders if he finds out the true price they had to pay for these abilities and goes AWOL? How do we stop him? What price becomes too high?
