Macrophage Regulation of Immunity

Macrophage Regulation of Immunity

Macrophage Regulation of Immunity contains the proceedings of a conference held in Augusta, Michigan, on March 12-14, 1979. The papers examine the role of macrophages in the regulation of cellular immune reactions. They highlight the interaction between macrophages and T cells, along with immune response gene control and macrophage secretion of a number of lymphostimulatory molecules.

Organized into six sections encompassing 35 chapters, this volume begins with an overview of antigen handling and presentation, immune response gene control, antigen-presenting cells, and factors affecting lymphocyte-macrophage interactions. It then discusses genetic control of T cell-macrophage interaction in helper cell induction in vitro; mechanisms underlying the interaction of guinea pig T lymphocytes with antigen-pulsed macrophages; and secretion of arachidonic acid oxygenation products by mononuclear phagocytes and their possible role as modulators of lymphocyte function. The book also covers regulation of intracellular killing by extracellular stimulation of the monocyte membrane, and adjuvant activation of macrophage functions.

Students and scientists will find this book extremely helpful.
