Who Needs Emotions?: The Brain Meets the Robot (Series in Affective Science)

Who Needs Emotions?: The Brain Meets the Robot (Series in Affective Science)

The idea that some day robots may have emotions has captured the imagination of many and has been dramatized by robots and androids in such famous movies as *2001 Space Odyssey's* HAL or *Star Trek's* Data. By contrast, the editors of this book have assembled a panel of experts in neuroscience and artificial intelligence who have dared to tackle the issue of whether robots can have emotions from a purely scientific point of view. The study of the brain now usefully informs study of the social, communicative, adaptive, regulatory, and experimental aspects of emotion and offers support for the idea that we exploit our own psychological responses in order to feel others' emotions. The contributors show the many ways in which the brain can be analyzed to shed light on emotions. Fear, reward, and punishment provide structuring concepts for a number of investigations. Neurochemistry reveals the ways in which different "neuromodulators" such as serotonin, dopamine, and opioids can affect the emotional valence of the brain. And studies of different regions such as the amygdala and orbitofrontal cortex provide a view of the brain as a network of interacting subsystems. Related studies in artificial intelligence and robotics are discussed and new multi-level architectures are proposed that make it possible for emotions to be implemented. It is now an accepted task in robotics to build robots that perceive human expressions of emotion and can "express" simulated emotions to ease interactions with humans. Looking towards future innovations, some scientists posit roles for emotion with our fellow humans. All of these issues are covered in this timely and stimulating book which is written for researchers and graduated students in neuroscience, cognitive science, psychology, robotics, and artificial intelligence.

From reader reviews:

Roberto Fetter:

Why don't make it to be your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite guide and reading a e-book. Beside you can solve your condition; you can add your knowledge by the book entitled Who Needs Emotions?: The Brain Meets the Robot (Series in Affective Science). Try to make the book Who Needs Emotions?: The Brain Meets the Robot (Series in Affective Science) as your good friend. It means that it can to get your friend when you really feel alone and beside regarding course make you smarter than previously. Yeah, it is very fortunated to suit your needs. The book makes you far more confidence because you can know every little thing by the book. So , let's make new experience and also knowledge with this book.

Bobby Gonsalves:

Have you spare time for any day? What do you do when you have much more or little spare time? That's why, you can choose the suitable activity regarding spend your time. Any person spent their own spare time to take a go walking, shopping, or went to the Mall. How about open or perhaps read a book allowed Who Needs Emotions?: The Brain Meets the Robot (Series in Affective Science)? Maybe it is for being best activity for you. You understand beside you can spend your time using your favorite's book, you can wiser than before. Do you agree with it is opinion or you have other opinion?

Silvia Smedley:

Reading can called thoughts hangout, why? Because when you are reading a book particularly book entitled Who Needs Emotions?: The Brain Meets the Robot (Series in Affective Science) your head will drift away trough every dimension, wandering in each aspect that maybe not known for but surely might be your mind friends. Imaging every single word written in a e-book then become one form conclusion and explanation that maybe you never get before. The Who Needs Emotions?: The Brain Meets the Robot (Series in Affective Science) giving you another experience more than blown away your thoughts but also giving you useful details for your better life with this era. So now let us show you the relaxing pattern is your body and mind will likely be pleased when you are finished studying it, like winning a game. Do you want to try this extraordinary wasting spare time activity?

Marjorie Ishee:

That e-book can make you to feel relax. That book Who Needs Emotions?: The Brain Meets the Robot (Series in Affective Science) was multi-colored and of course has pictures on the website. As we know that book Who Needs Emotions?: The Brain Meets the Robot (Series in Affective Science) has many kinds or style. Start from kids until adolescents. For example Naruto or Investigator Conan you can read and feel that you are the character on there. Therefore , not at all of book tend to be make you bored, any it makes you feel happy, fun and rest. Try to choose the best book for you personally and try to like reading which.
