The Banggai Cardinalfish: Natural History, Conservation, and Culture of *Pterapogon kauderni*

Alejandro A. Vagelli

The Banggai cardinalfish, *Pterapogon kauderni*, is a fascinating species that possesses a series of remarkable biological characteristics making it unique among coral reef fishes. It has been the focus of studies in reproduction, ecology, population genetics and evolution. In addition, since its rediscovery in the late 1990s, it has become tremendously popular in the international ornamental fish trade, and indiscriminate collecting has led to its inclusion in the 2007 IUCN Red List as an endangered species.

This book is divided into three main parts: a general introduction to the fish, including a historical synopsis with an overview of the Banggai Archipelago; a comprehensive treatment of the species' natural history (distribution, morphology, reproduction, embryology, ecology, genetics, systematics and evolution); an account of the conservation of the species, including descriptions of its fishery, attempts to protect it under CITES, and introduction programmes. The book also includes an appendix offering information on captive breeding, juvenile mortality reduction, and common diseases.

This book is a unique resource for ichthyology students and researchers working on fish biology, ecology and conservation, and for marine ornamental fish hobbyists and aquarium professionals.

From reader reviews:

Jodie Long:

Book is to be different for each and every grade. Book for children till adult are different content. We all know that that book is very important for us. The book *The Banggai Cardinalfish: Natural History, Conservation, and Culture of Pterapogon kauderni* seemed to be making you to know about other knowledge and of course you can take more information. It doesn't matter what advantages for you. The guide *The Banggai Cardinalfish: Natural History, Conservation, and Culture of Pterapogon kauderni* is not only giving you considerably more new information but also being your friend when you experience bored. You can spend your own spend time to read your guide. Try to make relationship with the book *The Banggai Cardinalfish: Natural History, Conservation, and Culture of Pterapogon kauderni*. You never experience lose out for everything should you read some books.

Jeannine Ricks:

Reading a reserve tends to be new life style on this era globalization. With reading through you can get a lot of information that will give you benefit in your life. Along with book everyone in this world may share their idea. Ebooks can also inspire a lot of people. Lots of author can inspire all their reader with their story or maybe their experience. Not only situation that share in the books. But also they write about the knowledge about something that you need illustration. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors on earth always try to improve their proficiency in writing, they also doing some exploration before they write to their book. One of them is this *The Banggai Cardinalfish: Natural History, Conservation, and Culture of Pterapogon kauderni*.

Charles Felton:

That book can make you to feel relax. This book *The Banggai Cardinalfish: Natural History, Conservation, and Culture of Pterapogon kauderni* was colorful and of course has pictures on the website. As we know that book *The Banggai Cardinalfish: Natural History, Conservation, and Culture of Pterapogon kauderni* has many kinds or category. Start from kids until teens. For example *Naruto* or *Private eye Conan* you can read and feel that you are the character on there. Therefore , not at all of book are make you bored, any it makes you feel happy, fun and loosen up. Try to choose the best book for you and try to like reading that.

Fannie Vincent:

As a pupil exactly feel bored for you to reading. If their teacher asked them to go to the library or to make summary for some guide, they are complained. Just very little students that has reading's internal or real their passion. They just do what the professor want, like asked to the library. They go to there but nothing reading seriously. Any students feel that examining is not important, boring and can't see colorful photos on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this period of time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this *The*

Banggai Cardinalfish: Natural History, Conservation, and Culture of Pterapogon kauderni can make you feel more interested to read.
