Csbs DP Caregiver Questionnaires, Normed Edition (Package of 50) Amy Wetherby "Ph.D. CCC-SLP", Barry Prizant "Ph.D. CCC-SLP"

The *CSBS DP™ Caregiver Questionnaires*, sold in packages for easy re-ordering, are forms for the *Communication and Symbolic Behavior Scales Developmental Profile (CSBS DP™)*, an easy-to-use, norm-referenced screening and evaluation tool that measures the communicative competence of children with a functional communication age of 6 to 24 months and a chronological age of 6 months to 6 years.

Derived from the popular, norm-referenced *CSBS™*, *CSBS DP™* is shorter and faster and lets early intervention professionals begin identification earlier. *CSBS DP™* is an ideal starting point for planning IFSPs, determining the efficacy of interventions, documenting changes in a child's behavior over time, and identifying areas for further assessment.

A package of *CSBS DP™ Caregiver Questionnaires* includes 50 of these easy-to-read four-page questionnaires, which are used when the initial screening indicates a need for further evaluation. It takes approximately 15–25 minutes and is designed to be given or mailed to the caregiver before the child is brought in for the *CSBS DP™ Behavior Sample*.

Available separately or as part of the *CSBS DP™ Complete Kit* are the other materials required to conduct a *CSBS DP™* assessment.

These forms are part of *CSBS DP™*, an easy-to-use, norm-referenced screening and evaluation tool that helps determine the communicative competence (use of eye gaze, gestures, sounds, words, understanding, and play) of young children. *CSBS DP* is **an ideal** starting point for IFSP planning and can be used as a guide to indicate areas that need further assessment.

This product is sold in a package of 50.
