Molecular Interventions in Lifestyle-Related Diseases (Oxidative Stress and Disease)

Nutraceuticals, Functional Foods, Micronutrients, and Pharmacological Interventions

When bad lifestyle choices cause oxidants and free radicals to have a negative influence on cell signaling and gene expression, lifestyle-related diseases are set into motion, which in turn lead to further oxidative stress.

Molecular Interventions in Lifestyle-Related Diseases addresses the molecular basis of free radicals and lifestyle-related diseases and preventive/therapeutic approaches including the use of nutraceuticals, functional foods, and pharmacological interventions. Each section contains several chapters addressing critical molecular mechanisms, therapeutic interventions, and other issues of relevance to human health that will be of interest to students and researchers in the health professions including nutritional and environmental scientists, molecular and cell biologists and others in the biomedical community
