Person-Environment Psychology: New Directions and Perspectives

A variety of theoretical approaches to person-environment psychology has been developed over the years, representing a rich range of intellectual perspectives. This second edition links the past and present and looks toward the future in reviewing new directions and perspectives in person-environment psychology. Stated differently, the main thrust of this volume is to present contemporary models and perspectives that make some sensible predictions concerning the individual and the environment using the person-environment relationship. Within a person-environment framework, these models and perspectives are concerned with how people tend to influence environments and how environments reciprocally tend to influence people. Thus, this second edition presents new directions in person-environment psychology and the implications for theory, research, and application.
