Space Meets Status: Designing Workplace Performance Jacqueline Vischer

Showing how worker productivity and stress levels are affected by factors such as lighting, ventilation, temperature, noise and layout, this book demonstrates how the technical aspects of human comfort do not always tally with users' perceptions and behaviour. With vivid examples and case studies to illustrate how space is a corporate resource rather than simply overhead, Vischer reveals how companies can improve their ability to make design decisions on how best to accommodate their employees in a high quality workspace.
