## Primate Conservation

Primate Conservation provides a comprehensive discussion of the conservation of many species of nonhuman primates. The problems of conservation are discussed by distinguished scientists who are experts in their knowledge of the animals they write about and who have firsthand knowledge of the problems of conserving them. Animals ranging from Galago to the Gorilla have been selected to serve as examples of the types of problems that conservationists face.

The book begins by discussing the ecology of two species of galagine in South Africa. It covers factors such as their distribution, habitat, population densities, activity patterns, feeding, group structure, and reproduction. This is followed by separate chapters on the conservation of the following: aye-aye; the lion tamarins of Brazil; the Peruvian yellow-tailed woolly monkey; the toque macaque of Sri Lanka; rare lion-tailed monkey of South India; rhesus monkeys in Northern India; the gelada baboons; the hanuman langur and douc langur; red ouakaris; black colobus monkeys; lesser apes; and eastern gorillas.
