Sinonasal Complications of Dental Disease and Treatment: Prevention - Diagnosis - Management

Filling a gap in the literature, this unique and innovative reference is a comprehensive guide to the management of sinonasal complications of dental disease and treatment. It bridges the fields of otorhinolaryngology and oral surgery, providing multidisciplinary and precise discussion of the etiology, prevention, diagnosis, and treatment of sinonasal complications. The text considers complications following inadequately treated dental infection, improper endodontic treatments, implant placement, and maxillary sinus grafting prior to or in association with oral implant placement. Readers will find complete coverage of both medical and surgical protocols to prevent and treat sinonasal complications, with practical guidance for the diagnostic and therapeutic dilemmas posed by these often clinically complex cases.

Special Features:

- Insights from otorhinolaryngologists, craniomaxillofacial surgeons, oral surgeons, and dentists allow for the effective treatment of a broad range of complications, from fungus balls and oro-antral fistulae to peri-implant osteitis with sinusitis and failed maxillary sinus augmentation procedures
- Chapter on anatomy, physiology, and pathophysiology of the paranasal sinuses presents relevant background information
- Thorough description of surgical procedures, including functional endoscopic sinus surgery (FESS) and intraoral approaches, used separately or in combination
- More than 300 high-quality images, including radiological images, color line illustrations, and photographs, support and enhance the text
- Flow charts, tables, and key points throughout the book offer quick access to crucial details
- Case reports and online surgical videos aid in the application of concepts to everyday practice

Sinonasal Complications of Dental Disease and Treatment: Prevention–Diagnosis–Management is an indispensable resource for otorhinolaryngologists, oral surgeons, craniomaxillofacial surgeons, and dentists who encounter patients with sinonasal complications resulting from dental pathologies or treatments.
