Solar Engineering of Thermal Processes

John A. Duffie, William A. Beckman

Solar Engineering of Thermal Processes John A. Duffie, William A. Beckman

The updated fourth edition of the "bible" of solar energy theory and applications

Over several editions, *Solar Engineering of Thermal Processes* has become a classic solar engineering text and reference. This revised *Fourth Edition* offers current coverage of solar energy theory, systems design, and applications in different market sectors along with an emphasis on solar system design and analysis using simulations to help readers translate theory into practice.

An important resource for students of solar engineering, solar energy, and alternative energy as well as professionals working in the power and energy industry or related fields, *Solar Engineering of Thermal Processes, Fourth Edition* features:

- Increased coverage of leading-edge topics such as photovoltaics and the design of solar cells and heaters
- A brand-new chapter on applying CombiSys (a readymade TRNSYS simulation program available for free download) to simulate a solar heated house with solar- heated domestic hot water
- Additional simulation problems available through a companion website
- An extensive array of homework problems and exercises

From reader reviews:

Amy Hewitt:

Do you have favorite book? For those who have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each e-book has different aim or goal; it means that book has different type. Some people sense enjoy to spend their the perfect time to read a book. They are reading whatever they take because their hobby is definitely reading a book. Consider the person who don't like reading a book? Sometime, man feel need book when they found difficult problem or maybe exercise. Well, probably you will want this Solar Engineering of Thermal Processes.

Lori Gravitt:

The book Solar Engineering of Thermal Processes has a lot associated with on it. So when you read this book you can get a lot of advantage. The book was compiled by the very famous author. This articles author makes some research ahead of write this book. This particular book very easy to read you will get the point easily after reading this article book.

Elvis Harris:

People live in this new morning of lifestyle always attempt to and must have the spare time or they will get large amount of stress from both daily life and work. So , if we ask do people have free time, we will say absolutely sure. People is human not really a robot. Then we request again, what kind of activity do you possess when the spare time coming to an individual of course your answer will certainly unlimited right. Then do you ever try this one, reading textbooks. It can be your alternative within spending your spare time, the particular book you have read will be Solar Engineering of Thermal Processes.

Phillip Vargas:

Playing with family in a park, coming to see the coastal world or hanging out with good friends is thing that usually you could have done when you have spare time, then why you don't try factor that really opposite from that. Just one activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of knowledge. Even you love Solar Engineering of Thermal Processes, you are able to enjoy both. It is good combination right, you still want to miss it? What kind of hangout type is it? Oh occur its mind hangout fellas. What? Still don't have it, oh come on its called reading friends.
