Theories and Ideas Surrounding the Human Genome & Behavior: The concept behind Genetics and Behavioral Science are without a doubt two of the most important and interesting issues we are faced with in our modern world. As time passes, people will continue to mix racially as in the recent past. Due to this present day situation, it is urgent that we address methods when dealing with such cases. Whether affected directly or indirectly, our enhancement regarding this rapid mix of races and cultures must be priority. In this book are solutions to the world's problems associated with both dynamic fields. The information deals with the how and why we insist on racially crossbreeding, and the behavioral aspect of such breeding. This information is essential, enabling humankind to better outline and predict behavior and the genetics of our being.
